Texas Association of Private and Parochial Schools

PREPARTICIPATION PHYSICAL EVALUATION MEDICAL HISTORY

This **MEDICAL HISTORY FORM** must be completed annually by parent (or guardian) and student in order for the student to participate in TAPPS athletic activities. These questions are designed to determine if the student has developed or experienced any condition which would make it hazardous to participate in an athletic event.

STUDENT'S NAME: _____

Sudden Cardiac Arrest occurs in persons of all ages. The answers to questions # 4-19 above will assist in determining whether additional testing may be required for your son or daughter. If you have answered yes to any of these questions, please review with your health care professional whether additional testing may be necessary including but not limited to EKG and for ECG.

| 22. Have you ever had a seizure? | <input type="checkbox"/> | <input type="checkbox"/> |
| 23. Have you ever had numbness or tingling in your arms, hands, legs, or feet? | <input type="checkbox"/> | <input type="checkbox"/> |

SUDDEN CARDIAC ARREST

What is Sudden Cardiac Arrest (SCA)?

Sudden Cardiac Arrest is when the heart stops beating, suddenly and unexpectedly. When this happens blood stops flowing to the brain and other vital organs. SCA is not a heart attack. A heart attack may cause SCA, but they are not the same. A heart attack is caused by a blockage that stops the flow of blood to the heart. SCA is a malfunction of the heart's electrical system, causing the heart to stop beating.

How common is Sudden Cardiac Arrest?

While studies differ in the actual rate of occurrence, the American Heart Association information indicates that there are approximately 300,000 SCA events outside hospitals each year in the United States. About 2000 patients under the age of 25 die of SCA each year. Studies now being performed in Texas and other states indicate the occurrence rate for high school age athletes may be greater than this figure.

Are there warning signs?

Although SCA happens unexpectedly, some people may have signs or symptoms, such as:

Dizziness	Fatigue	Lightheadedness
Extreme tiredness	Shortness of breath	Nausea
Difficulty breathing	Vomiting	Racing or fluttering heartbeat
Chest Pains	Syncope (fainting)	

These symptoms can be confusing and unclear in athletes. Often people confuse these warning signs as physical exhaustion. SCA can be prevented if the underlying causes can be diagnosed and treated.

For this reason these symptoms are included on the Medical History form provided by TAPPS and required for each student prior to participation in athletic events each year. As parents and student athletes, your truthful answers to these simple questions will assist your medical practitioner when performing the annual physical examination.

What are the risks of participation and playing with these symptoms?

Continued participation brings with it increased risk. This includes playing in practices and games. When the heart stops, so does the blood that flows to the brain and other vital organs. Death or permanent brain damage can occur in just minutes. Most people who experience a SCA die from the event.

While TAPPS does not mandate Cardiac Screening prior to participation, TAPPS and the TAPPS member schools recognize the importance of our students' health and highly recommend discussing screening options with your health care provider. Any student who shows signs of SCA should be removed by the parents from play. This includes all athletic activity, practices or contests. Before returning to play, the student should be examined and receive clearance by a licensed health care professional of the parents' choosing.

**I have reviewed the above material. I understand the symptoms and warning signs of SCA.
Additional information is available on the Health and Safety page at www.tapps.net.**

CONCUSSION AND TRAUMATIC BRAIN INJURY

What is a concussion?

A concussion is a brain injury that:

- Is caused by a bump, blow, or jolt to the head or body
- Can change the way a student's brain normally functions
- Can occur during practice or contests in any sport
- Can occur in activities both associated and not associated with the school
- Can occur even if the student has not lost consciousness
- Can be serious even if a student has just been "dinged" or had their "bell rung"

Are the symptoms of a concussion?

Concussions cannot be seen; however, in a potentially concussed student, one or more of the following symptoms may become apparent. The student may not "feel right" soon after, a few days after or even weeks after the injury event.

Headache	"Pressure" in the head	Nausea	Vomiting
Balance problems	Dizziness	Blurry Vision	Double Vision
Sensitivity to Light	Sensitivity to Noise	Confusion	Memory Problems
Difficulty paying attention	Feeling sluggish, hazy, foggy or groggy		

If you have concerns regarding any of the above symptoms, your doctor should be consulted for further information and/or examination. Your physician or medical professional can best determine your student's physical condition and ability to participate in athletics.

What should students do if they believe that they or someone else may have a concussion?

- Students should immediately notify their coach or school personnel.
- Student should be examined by appropriate medical personnel of the parent's choosing. The medical provider should be trained in the diagnosis and treatment of concussions
- If no concussion is diagnosed, the student shall be cleared to return to athletic participation.
- If a concussion is diagnosed, the school protocol for return to play from a concussion shall be enacted. Under no circumstances shall the student be allowed to return to practice or play without the approval of a licensed medical provider trained in the treatment of concussions.

I have reviewed the above material. I understand the symptoms and warning signs of CONCUSSIONS. Additional information is available on the Health and Safety page at www.fapps.net. All concussions should be reported to the school as soon as possible.

Previous concussions should be reported on the Medical History form to allow the medical practitioner the best information possible when conducting the annual physical examination.

CONCUSSIONS – Don't hide it. Report it. Take time to recover.

**Texas Association of Private and Parochial Schools
Student Acknowledgement of Rules**

Student Name: _____

Date of Birth: _____ Grade Level: 9 10 11 12

Is the student transferring from another high school this year? YES NO

This form must be completed by the student and parent/guardian each year prior to participation in TAPPS activities at the member school. In accordance with the TAPPS Constitution and By-Laws, we attest that the above named student:

- has not reached 19 years of age prior to September 1 of the current year.
- has not graduated from high school
- did not enroll in the ninth grade more than four years ago
- did not enroll in the tenth grade more than three years ago
- did not participate with or against high school students more than four years ago

Student presently resides with biological or adoptive parents? YES NO

If the student is not presently living with biological or adoptive parents,

- If a US citizen, the student must be in compliance with the rules set forth in Section 80 of the TAPPS By-Laws and approved by TAPPS prior to varsity participation in Fine Arts or Athletics.
- If not a US citizen, the student must be in compliance with the rules set forth in Section 102 of the TAPPS By-Laws and approved by TAPPS prior to varsity participation in Fine Arts or Athletics.

Student is a returning high school student or incoming ninth grade student? YES NO

If transferring from a high school,

- the student was withdrawn from the previous high school, enrolled in and attending the new school prior to the TRANSFER DEADLINES as posted on the TAPPS website.
- The student is in compliance with the provisions presented in Section 104 of the TAPPS By-Laws
- The student has not participated on a high school team, select, AAU, club, 7 on 7 team or similar organized activity coached or directed by a staff member at the new school in the past 12 months.

The above named student

- is a full time day student at the member school as defined in the TAPPS Constitution and By-Laws
- has not represented a college in any contest
- is in compliance with the TAPPS awards rule as presented in the TAPPS By-Laws
- is in compliance with all TAPPS eligibility requirements as presented in the TAPPS Constitution and By-Laws

The school has explained and we are/will be in compliance with the TAPPS governance pertaining to In Season, Off Season and Summer Participation.

The school has explained and we are/will be in compliance with TAPPS governance preventing unattached participation in TAPPS activities.

I understand and attest that the burden of proof pertaining to the eligibility of my child rests solely with the student and parents. In the event eligibility is subject to review, we will provide all information requested by TAPPS included but not limited to birth certificate, transcripts, financial information and all reasonable and pertinent information necessary to establish the student's eligibility to compete.

PARENT AND STUDENT NOTIFICATION STERIOD USE AGREEMENT FORM

State law prohibits possessing, dispensing, delivering or administering a steroid in a manner not allowed by state law.

State law requires that only a medical doctor may prescribe a steroid for a person.

State law provides that body building, muscle enhancement or the increase in muscle bulk or strength through the use of a steroid by a person in good health is not a valid medical purpose.

Any violation of state law concerning steroids is a criminal offense punishable by confinement in jail or imprisonment in the Texas Department of Criminal Justice.

HEALTH CONSEQUENCES ASSOCIATED WITH ANABOLIC STEROIDS

(source: National Institute on Drug Abuse)
<http://www.nida.nih.gov/infofacts/steroids.html>

For boys and men - shrinking of the testicles, reduced sperm count, infertility, baldness, development of breasts, increased risk for prostate cancer.

For girls and women - growth of facial hair, male-pattern baldness, changes in or cessation of the menstrual cycle, enlargement of the clitoris, deepened voice.

For adolescents - growth halted prematurely through premature skeletal maturation and accelerated puberty changes. This means that adolescents risk remaining short for the remainder of their lives if they take anabolic steroids before the typical adolescent growth spurt.

For all ages - potentially fatal liver cysts and liver cancer; blood clotting, cholesterol changes, and hypertension which can promote heart attack and stroke; and acne. Available evidence may suggest that anabolic steroid abuse, particularly in high doses, promotes aggression that can manifest as fighting, physical and sexual abuse, and property crimes. Upon stopping anabolic steroids, some abusers may experience symptoms of depressed mood, fatigue, restlessness, loss of appetite, insomnia, headaches, muscle and joint pain and the strong desire to return to the use of anabolic steroids.

For injectors - infections resulting from the use of shared needles or non-sterile equipment, including HIV / AIDS, hepatitis B and C, and infective endocarditic, a potentially fatal inflammation of the inner lining of the heart. Bacterial infections can develop at the injection site, causing pain and abscess.

STUDENT CERTIFICATION

I have read the above information and agree that I will not use illegal anabolic steroids.

Student Signature

Date

PARENT / GUARDIAN CERTIFICATION

I have read the above information and agree to my knowledge my student will not use illegal anabolic steroids.
